

IMPORTANT INFORMATION FOR DELEGATES

Welcome to Digital Dentistry & Dental Technology 2018

Please read this information before 9.00 am on Friday, September 21

[The full programme is available online and in your conference satchel](#)

- As part of your registration to Digital Dentistry & Dental Technology 2018, you have a choice of participating in over 80 sessions delivered by 30 speakers representing virtually every aspect of treatment and solution available in digital dentistry today.
- The event is designed to allow you to create your own programme based on your individual needs and interests - you can participate in any session provided there is capacity.
- The event commences at 9.00 am.
- **At 9.00 am, you will have a choice of attending SIX different sessions (see inside) - So please take the time NOW to make your choices if you have not already done so.**
- More than 250 people have registered for the conference.
- Stream 1 has a capacity of 120 people - the first session is 90 minutes.
- Stream 2 has a capacity of 80 people - the first two sessions are 45 minutes each.
- Streams 3-6 only have capacities of 20-30 people each.
- Streams 1, 3 and 4 are each offering a single 90-minute session before morning tea.
- Streams 2, 5 and 6 are each offering two 45-minute sessions before morning tea.
- **Please make 2 choices in case your first choice fills.**
- Many sessions are repeated over the two days so you will not be disappointed.
- The full programme of 80 session choices are contained in your conference satchel.
- Morning Tea will be served at 10.30am in Ballrooms 2 & 3 including tea and coffee.
- Free barista-made coffee is continually available at the XYZ Coffee Stop throughout the event.

NB: THE FULL PROGRAMME IS IN YOUR SATCHEL!

FRIDAY, 21 SEPTEMBER 2018

FRIDAY, 21 SEPTEMBER 2018

STREAM 1 BALLROOM 3

09.00 am - 09.10 am

Opening and Welcome

09.10 am - 10.30 am

Welcome to the digital dentistry revolution

Speaker:
Lee Culp

Topic: Digital Dentistry

Audience: General Dentist
Prosthodontist

Throughout the years, restorative trends and techniques have come and gone. Some material developments have transformed the face of aesthetic dentistry, while other initial concepts have phased out and died. Yet the concept of digital dentistry is one that started out small, and has progressively increased in momentum until its boundaries appear to have become endless. The most exciting factor surrounding these technologies is not, however, only in the potential applications of these technologies that are being hypothesized by dental professionals. These advancements are not, therefore, something that will "eventually" emerge in the market, they are realities that are currently being released to further revolutionize the quality of dental care that is being delivered in modern restorative dentistry. As dentistry evolves into the digital world, the successful incorporation of computerization and new technology will continue to provide more efficient methods of communication and fabrication while at the same time retaining the individual creativity and artistry of the skilled dentist and dental technician, while the utilization of new technology will continue to enhance the close cooperation and working relationship of the dentist/technician team.

STREAM 2 CENTENNIAL ROOM

09.00 am - 09.45 am

The Dental Solution and our digital journey

Speaker:
John Scollo

Topic: Digital Dentistry

Audience: Dental Prosthetist
Dental Technician

The Dental Solution is one of the largest dental laboratories in Australia, located on Collins Street in the heart of the Melbourne CBD. Principal John Scollo will detail their digital journey from an analogue laboratory to a state-of-the-art manufacturing facility filled with mills, scanners and 3D printers in what is an inspiring case study for any laboratory looking to transition or to simply grow and succeed in the digital age.

09.45 am - 10.30 am

The evolution of Australia's largest dental laboratory

Speaker:
Matthew Race

Topic: Digital Dentistry

Audience: Dentist, Prosthetist,
Dental Technician

Race Dental is Australia's largest dental laboratory. Now in its third generation of family ownership, Race Dental's journey has paralleled the leading edge of digital development as it fiercely defends its mission to retain manufacturing onshore. Race Dental combines traditional bespoke craftsmanship with the latest in 3D printing, milling, laser sintering and computer aided design to meet and exceed the needs of dentists in Australia and beyond. In this session, Matt Race will chronicle their journey to date, the scope of their operations and provide insight to laboratories small.

STREAM 3 BOTANY ROOM

09.00 am - 10.30 am

inLab18 and the multi layer gingiva implant bridge

Speaker:
Chris Hussey

Topic: Software, CAD/CAM,
Implant Prosthetics

Audience: Dental Prosthetist
Dental Technician

A demonstration and update of the full capabilities of inlab 18 CAD design software. The demonstration of how inLab 18 integrates with the dentist on a digital platform. New applications such as Model 18 demonstrating implant model printing from an intra oral impression are also presented.

STREAM 4 KINGSFORD ROOM

09.00 am - 10.30 am

Digital Dentures a Reality

Speaker:
John Batchelor

Topic: Digital Dentures

Audience: General Dentist
Prosthodontist
Dental Prosthetist
Dental Technician

The digital denture manufacturing process will be presented from scanning through to designing the digital denture and manufacturing process. Exciting technological advancements have changed clinical denture techniques and laboratory technology in an area of dentistry that has not seen change in many decades. Efficiencies and techniques will be discussed including hardware and software reviews.

STREAM 5 KURNELL ROOM

09.00 am - 09.45 am

New and Exciting Workflows with 3Shape

Speaker:
Joseph Tavella

Topics: CAD/CAM, Software

Audience: Dental Technician

Please join us for an exciting and informative lecture on what's new in 3Shape. Incorporating the latest software release of Dental System 2018. We will be demonstrating new workflows using 3Shape Smile Design, RealView Engine and Partial Denture Designs with Artificial teeth. This is a chance to learn about new workflows that can be easily integrated into your business.

09.45 am - 10.30 am

Succeeding with Intraoral Scanning

Speaker:
Dr Robert Ashman

Topic: Intraoral Scanning

Audience: General Dentist
Prosthodontist
Dental Prosthetist

Live Demonstration with 3Shape TRIOS intraoral scanner. Handy Tips and Tricks to Ensure Smooth Scanning.

Dr Ashman presents courtesy of:

STREAM 6 RANDWICK ROOM

09.00 am - 09.45 am

From Intraoral scan to physical model

Speaker:
Ryan Whitty

Topics: Intraoral Scanning, CAD/CAM,
3D Printing, Software

Audience: Dental Technician, Dentist,
Prosthodontist, Orthodontist

Intraoral scans are a great leap forward but need post processing to be fully usable for physical model construction. This workshop will discuss the STL file format, the shortcomings of intraoral scans and how to edit and prepare them ready for 3D printing in various software programs. This is an essential, informative discussion and a must for anyone interested in 3D printing.

Ryan Whitty presents courtesy of:

09.45 am - 10.30 am

3D printing 101

Speaker:
Terence Whitty

Topics: 3D Printing

Audience: Dental Technician, Dentist,
Orthodontist

This overview will discuss the process of additive manufacturing, commonly known as 3D printing, from inception to what it can actually do now. Different technologies will be discussed and the pros and cons of each evaluated. Special emphasis will be on the use of photopolymers for dental applications and investigate what is practical today rather than what is promised in the future.
